What This Is | Current Authority | Quickstart & License | Go Next

WHAT THIS IS

`ZPE Prosody` is the private staging repository for the ZPE Prosody Wave-1 lane. It is the authority surface for lane status and accepted claims, and it is not a public release surface.

MODALITY STATUS SNAPSHOT

Canonical authority block (sole lane truth):

Authority signal	Accepted truth
Repo stage	Private staging only
Lane verdict	`FAIL`
Accepted claim snapshot	`PRO-C001 PASS`, `PRO-C002 PASS`, `PRO-C003 PASS`, `PRO-C004 PASS`, `PRO-C005 PAUSED_EXTERNAL`, `PRO-C006 FAIL`
Authority bundle path	`proofs/artifacts/2026-02-20_zpe_prosody_wave1/`
Public release readiness	No
Acquisition surface	Private GitHub repo only (access by owner invitation)

REPO SHAPE

- `src/zpe_prosody/`: lane package - `scripts/`: gate and packaging scripts - `tests/`: unit coverage - `data/fixtures/`: deterministic fixtur
- `proofs/`: proof index, final status, runbooks, adjudicated bundle - `docs/`: architecture, legal boundaries, release-contract notes

QUICK START

```bash python -m venv .venv source .venv/bin/activate python -m pip install -e ".[dev]" make repo-sanity make package-sanity make test ```
Optional install surfaces: - `python -m pip install ".[api]"` for the FastAPI/Uvicorn wrapper - `python -m pip install ".[benchmarks]"` fo
the NumPy-backed benchmark helpers
Technical release truth:

- The base wheel ships only the `src/zpe_prosody` package.
- `scripts/` remains a repo-local operational harness, not an installed CLI surface.
- `make package-sanity` builds sdist and wheel, then verifies isolated base, `api`, and `benchmarks` installs from the built wheel.

WHERE TO GO

Supporting docs and authority anchors (start here for verification): - `docs/CANONICAL_DOC_REGISTRY.md` - `proofs/PROOF_INDEX.m
- `proofs/FINAL_STATUS.md` - `AUDITOR_PLAYBOOK.md` - `PUBLIC_AUDIT_LIMITS.md` - `docs/README.md` -
`docs/ARCHITECTURE.md` - `docs/LEGAL_BOUNDARIES.md`

OUT OF SCOPE

What is not claimed: - No public release readiness. - No commercial-safe transfer closure. - Retrieval closure on the accepted path is belo
threshold. - No Phase 4.5 performance augmentation or Phase 5 blind-clone verification yet.
